

## **ANALYSIS OF FINANCIAL BEHAVIOUR WITH HANDWRITING PSYCHOLOGY**

With Dr. Pulipilellil Sheetal Thomas

Assistant Professor with Indukaka Ipcowala Institute of Management, CHARUSAT, Anand,  
Gujarat, India

**Seminar (Zoom) on 20 May 2022, 16:00-17:30 (Zurich time)**

Handwriting psychology has reached many application fields besides previously traditional HR assessment. Its current development as a natural science opens even more possibilities. That is why more and more research is done in different fields, which are not directly related to classical handwriting analysis, such as computer science, forensic psychology, medicine, and others among them.

At our seminar, we are happy to have our colleague from India with a very interesting and innovative topic. She will present some results from her PhD thesis and her considerations concerning the analysis of financial behaviour using handwriting psychology.

The seminar language is English.

We are happy to welcome you to our seminar.

Please register for the seminar at [contact@ihs-sgg.ch](mailto:contact@ihs-sgg.ch) (Zoom link will be sent later).

For the IHS INSTITUTE FOR HANDWRITING SCIENCES

General Director  
Dr. Marie Anne Nauer

Research Director  
Dr. Yury Chernov
